PROFILE

Data Analyst at the Eastern Cape Department of Education since 2024, building dashboards, reporting tools and data capture systems for planning and management decisions. Experience in data validation, KPI reporting, database design and stakeholder collaboration. Skills include SQL, Python, Power BI and Looker Studio, supported by a public portfolio of analytics and development projects.

TECHNICAL SKILLS

Analysis & reporting: Power BI, Looker Studio, Excel, Google Sheets, data cleaning and validation, dashboard development, KPI reporting

Programming & databases: SQL, Python, JavaScript, HTML, PostgreSQL, MySQL

Platforms & delivery: Google Apps Script, Google Workspace, Microsoft Azure, stakeholder engagement, workflow documentation, process improvement

PROFESSIONAL EXPERIENCE

Data Analyst — Eastern Cape Department of Education

2024–Present | eTeaching & Learning Directorate | East London

- Analyse school performance and infrastructure data using Google Sheets, JavaScript and Looker Studio, producing dashboards for directorate and executive decisions.
- Developed an end-to-end HRD Skills Audit solution to provide visibility into workforce skills gaps.
- Built a Google Apps Script progressive web app dashboard for cross-device data visualisation, reducing manual reporting effort.
- Designed documentation, workflows and database schema for the ECDoE Partnerships Database to standardise data capture and reporting.
- Developed a department-wide quarterly and annual plan submission tool with KPI indicators to flag at-risk items. Delivered dashboards replacing manual spreadsheet reporting across two directorates.

SELECTED PORTFOLIO PROJECTS

E-Teaching & Learning Dashboard — React/TypeScript, Django/Python, PostgreSQL
Built a local review version for school ICT, connectivity, training and monitoring data, with workbook imports and record reconciliation. View case study.

Monthly Budget Planner — Python, Streamlit, pandas
Built an interactive ZAR budget tool with income, expense and savings tracking, visual summaries, overspending feedback and CSV export. View source code.
